RE: Petrographic Analysis of D Sand Cores - Big Springs Field

Dear Mr. Weber:

Attached please find a brief petrographic analysis of thin sections taken from cores of the D sand at Big Springs field, Deuel County, Nebraska. Samples were taken for thin section analysis from BSU 25, SE SE Section 11-T13N-R43W, and from BSU 26, NE NE Section 18-T13N-R42W. Cores for these wells are located at the USGS Core Research Center in the Denver Federal Center.

These analyses do not relate directly to my dissertation work, and I do not claim to be a sedimentary petrologist; however, I hope that the brief descriptions and accompanying photomicrographs may be of use to you in your operation of the Big Springs gas storage field.

Please call me if you have questions.

Very truly yours,

David W. Oldham
